

I. In The Claims

1. (currently amended) A method ~~for~~ of using computers to communicate over an Internet network, the method including the steps of:

connecting a plurality of participator computers with a controller computer through the Internet network, each said participator computer connected to an input device and to an output device; and

arbitrating with the controller computer, in accordance with predefined rules including a test for an authenticated user identity, to determine which ones of the participator computers can form a group to send and receive communications ~~in real time over the Internet,~~ ; and

sending and receiving said communications in real time over the Internet network between said participator computers in said group, some of said communications including a ~~human sound~~, a respective video, a graphic, or a pointer-triggered message, ~~or a combination thereof.~~

2. (currently amended) The method of claim 1, wherein the steps of ~~arbitrating~~ sending and receiving are is carried out with one of said communications comprising said pointer-triggered communication message.

3. (currently amended) The method of claim 1, wherein the steps of ~~arbitrating~~ sending and receiving are is carried out with one of said communications comprising said pointer-triggered communication message and said sound and said graphic and further comprising a human communication sound.

4. (currently amended) The method of claim 1, wherein the steps of

arbitrating sending and receiving are is carried out with one of said communications comprising
said pointer-triggered communication message and said video and said graphic.

5. (currently amended) The method of claim 1, wherein the steps of
arbitrating sending and receiving are is carried out with one of said communications further
comprising said a human communication sound.

6. (currently amended) The method of claim 1, wherein the steps of
arbitrating sending and receiving are is carried out with one of said communications comprising
said sound and said video and further comprising a human communication sound.

7. (currently amended) The method of claim 1, wherein the steps of
arbitrating sending and receiving are is carried out with one of said communications comprising
said sound and said graphic and further comprising a human communication sound.

8. (currently amended) The method of claim 1, wherein the steps of
arbitrating sending and receiving are is carried out with one of said communications comprising
said sound and said pointer-triggered communication message and further comprising a human
communication sound.

9. (currently amended) The method of claim 1, wherein the steps of
arbitrating sending and receiving are is carried out with one of said communications further
comprising a human communication said sound, and wherein some of said communications
include text or ascii.

10. (currently amended) The method of claim 1, wherein the steps of arbitrating sending and receiving are is carried out with one of said communications comprising said video.

11. (currently amended) The method of claim 1, wherein the steps of arbitrating sending and receiving are is carried out with one of said communications comprising said video and said graphic.

12. (currently amended) The method of claim 1, wherein the steps of arbitrating sending and receiving are is carried out with one of said communications comprising said video and said pointer-triggered communication message.

13. (currently amended) The method of claim 1, wherein the steps of arbitrating sending and receiving are is carried out with one of said communications comprising said video, ~~and wherein some of said communications include~~ including and further comprising text or ascii.

14. (currently amended) The method of claim 1, wherein the steps of arbitrating sending and receiving are is carried out with one of said communications comprising said graphic.

15. (currently amended) The method of claim 1, wherein the steps of arbitrating sending and receiving are is carried out with one of said communications comprising said graphic and said pointer-triggered communication message.

16. (currently amended) The method of claim 1, wherein the steps of arbitrating sending and receiving are is carried out with one of said communications comprising said graphic, and wherein some of said communications include and further comprising text or ascii.

17. (currently amended) The method of claim 1, wherein the steps of arbitrating sending and receiving are is carried out with one of said communications comprising said sound and said video and said graphic and further comprising a human communication sound.

18. (currently amended) The method of claim 1, wherein the steps of arbitrating sending and receiving are is carried out with one of said communications comprising said sound and said video and said pointer-triggered communication message and further comprising a human communication sound.

19. (currently amended) The method of claim 1, wherein the steps of arbitrating sending and receiving are is carried out with one of said communications comprising said sound and said video, and wherein some of said communications include and further comprising a human communication sound and text or ascii.

20. (currently amended) The method of claim 1, wherein the steps of arbitrating sending and receiving are is carried out with one of said communications comprising said sound and said video and said graphic and said pointer-triggered communication message and further comprising a human communication sound.

21. (currently amended) The method of claim 1, wherein the steps of arbitrating sending and receiving are is carried out with one of said communications comprising said sound and said video and said pointer-triggered communication message and further comprising a human communication sound, and wherein some of said communications include text or ascii.

22. (currently amended) The method of claim 1, wherein the steps of arbitrating sending and receiving are is carried out with one of said communications comprising said sound and said video and said graphic and said pointer-triggered communication message, and wherein some of said communications include and further comprising a human communication sound and text or ascii.

23. (currently amended) The method of claim 1, wherein the steps of arbitrating sending and receiving are is carried out with one of said communications further comprising some of said communications include text or ascii.

24. (currently amended) The method of claim 1, wherein the steps of arbitrating sending and receiving are is carried out with one of said communications comprising the communication including said sound and said graphic, and wherein some of said communications include and further comprising a human communication sound and text or ascii.

25. (currently amended) The method of claim 1, wherein the steps of arbitrating sending and receiving are is carried out with one of said communications comprising the communication including said graphic and said video, and wherein some of said

communications include and further comprising text or ascii.

26. (currently amended) The method of claim 1, wherein the steps of arbitrating sending and receiving are is carried out with one of said communications comprising said pointer-triggered message, ~~and wherein some of said communications include~~ and further comprising text or ascii.

27. (currently amended) The method of claim 1, wherein the steps of arbitrating sending and receiving are is carried out with one of said communications comprising said pointer-triggered message and said video, ~~and wherein some of said communication~~ include and further comprising text or ascii.

28. (currently amended) The method of claim 1, wherein the steps of arbitrating sending and receiving are is carried out with one of said communications comprising said video and said graphic and said sound, ~~and wherein some of said communications include~~ and further comprising a human communication sound and text or ascii.

29. (currently amended) The method of claim 1, wherein the steps of arbitrating sending and receiving are is carried out with one of said communications comprising said pointer-triggered message and said sound, ~~and wherein some of said step~~ communications include and further comprising a human communication sound and text or ascii.

30. (currently amended) The method of claim 1, wherein the steps of arbitrating sending and receiving are is carried out with one of said communications comprising

~~said sound and said pointer-triggered communication message and said graphic, and wherein some of said communications include~~ and further comprising a human communication sound and text or ascii.

31. (currently amended) The method of claim 1, wherein the steps of ~~arbitrating sending and receiving are~~ is carried out with one of said communications comprising said video, and said graphic, and said pointer-triggered message, and wherein some of said communications include and further comprising text or ascii.

32. (currently amended) The method of claim 1, wherein the steps of ~~arbitrating sending and receiving are~~ is carried out with one of said communications comprising said graphic and said pointer-triggered communication message, and wherein some of said communications include and further comprising text or ascii.

33. (currently amended) The method of claim 170, wherein said step of arbitrating is carried out with ~~said sound and said pointer-triggered communication message, and further including the step of arbitrating with the controller computer and wherein said step of arbitrating includes arbitrating~~ to determine which of the participator computers can communicate a human communication sound and text or ascii to the other of the participator computers ~~text or ascii~~.

@

34. (currently amended) The method of claim 170, wherein said step of arbitrating is carried out with said pointer-triggered ~~communication message~~ and said graphic, and further including the step of arbitrating with the controller computer and wherein said step of arbitrating includes arbitrating to determine which of the participator computers can

communicate text or ascii to the other of the participator computers ~~text or ascii~~.

35. (currently amended) The method of claim 170, wherein said step of arbitrating is carried out with ~~said sound and~~ said video and said graphic, and further including the step of arbitrating with the controller computer and wherein said step of arbitrating includes arbitrating to determine which of the participator computers can communicate a human communication sound and text or ascii to the other of the participator computers ~~text or ascii~~.

I
36. (currently amended) The method of claim 170, wherein said step of arbitrating is carried out with ~~said sound and~~ said graphic and said pointer-triggered message, communication, and wherein said step of arbitrating includes arbitrating and further including the step of arbitrating with the controller computer to determine which of the participator computers can communicate a human communication sound and text or ascii to the other of the participator computers ~~text or ascii~~.

37. (currently amended) The method of claim 170, wherein said step of arbitrating is carried out with said graphic and said video, ~~and wherein said step of arbitrating includes arbitrating~~ and further including the step of arbitrating with the controller computer to determine which of the participator computers can communicate text or ascii to the other of the participator computers ~~text or ascii~~.

38. (currently amended) The method of claim 170, wherein said step of arbitrating is carried out with said video and said graphic and said pointer-triggered message, communication, and wherein and further including the step of arbitrating with the controller computer to determine which of the participator computers can communicate text or ascii to the

other of the participator computers ~~some of said communications include text or ascii.~~

39. (currently amended) The method of claim 170, wherein said step of arbitrating is carried out with said video and said pointer-triggered message, communication, ~~and wherein said step of arbitrating includes arbitrating~~ and further including the step of arbitrating with the controller computer to determine which of the participator computers can communicate text or ascii to the other of the participator computers ~~text or ascii.~~

40. (currently amended) The method of claim 170, wherein said step of arbitrating is carried out with said video and said graphic and said pointer-triggered ~~communication~~ message.

41. (currently amended) The method of claim 170, ~~wherein said step of arbitrating is carried out with said sound~~ further including the step of arbitrating with the controller computer to determine which of the participator computers can communicate a human communication sound.

42. (currently amended) The method of claim 170, wherein said step of arbitrating is carried out with ~~said sound and~~ said video, and further including the step of arbitrating with the controller computer to determine which of the participator computers can communicate a human communication sound.

43. (currently amended) The method of claim 170, wherein said step of arbitrating is carried out with ~~said sound and~~ said graphic, and further including the step of arbitrating with the controller computer to determine which of the participator computers can

communicate a human communication sound.

44. (currently amended) The method of claim 170, wherein said step of arbitrating is carried out with ~~said sound and~~ said pointer-triggered communication message and further including the step of arbitrating with the controller computer to determine which of the participator computers can communicate a human communication sound.

45. (currently amended) The method of claim 170, further including the step of arbitrating with the controller computer to determine which of the participator computers can communicate a human communication sound and text or ascii to the other of the participator computers ~~text or ascii.~~

46. (previously amended) The method of claim 170, wherein said step of arbitrating is carried out with said video.

47. (previously amended) The method of claim 170, wherein said step of arbitrating is carried out with said video and said graphic.

48. (previously amended) The method of claim 170, wherein said step of arbitrating is carried out with said video and said pointer-triggered ~~communication~~ message.

49. (currently amended) The method of claim 170, wherein said step of arbitrating is carried out with said video, ~~and wherein said step of arbitrating includes arbitrating~~ and further including the step of arbitrating with the controller computer to determine which of the participator computers can communicate text or ascii to the other of the participator

computers ~~text or ascii~~.

50. (previously amended) The method of claim 170, wherein said step of arbitrating is carried out with said graphic.

51. (currently amended) The method of claim 170, wherein said step of arbitrating is carried out with said graphic and said pointer-triggered ~~communication~~ message.

52. (currently amended) The method of claim 170, wherein said step of arbitrating is carried out with said graphic, ~~and wherein said step of arbitrating includes arbitrating~~ and further including the step of arbitrating with the controller computer to determine which of the participator computers can communicate text or ascii to the other of the participator computers ~~text or ascii~~.

53. (currently amended) The method of claim 170, wherein said step of arbitrating is carried out with ~~said sound and~~ said video and said graphic, and further including the step of arbitrating with the controller computer to determine which of the participator computers can communicate a human communication sound.

54. (currently amended) The method of claim 170 ~~3~~, wherein said step of arbitrating is carried out with ~~said sound and~~ said video and said pointer-triggered ~~communication~~ message, and further including the step of arbitrating with the controller computer to determine which of the participator computers can communicate a human communication sound.

55. (currently amended) The method of claim 170, wherein said step of arbitrating is carried out with ~~said sound and~~ said video, ~~and wherein said step of arbitrating includes arbitrating~~ and further including the step of arbitrating with the controller computer to determine which of the participator computers can communicate a human communication sound and text or ascii to the other of the participator computers ~~text or ascii~~.

56. (currently amended) The method of claim 170, wherein said step of arbitrating is carried out with ~~said sound and~~ said video and said graphic and said pointer-triggered ~~communication message, and~~ further including the step of arbitrating with the controller computer to determine which of the participator computers can communicate a human communication sound.

57. (currently amended) The method of claim 170, wherein said step of arbitrating is carried out with ~~said sound and~~ said video and said pointer-triggered ~~communication message, and wherein said step of arbitrating includes arbitrating and further including the step of arbitrating with the controller computer~~ to determine which of the participator computers can communicate a human communication sound and text or ascii to the other of the participator computers ~~text or ascii~~.

58. (currently amended) The method of claim 170, wherein said step of arbitrating is carried out with ~~said sound and~~ said video and said graphic and said pointer-triggered ~~communication message, and wherein said step of arbitrating includes arbitrating and further including the step of arbitrating with the controller computer~~ to determine which of the participator computers can communicate a human communication sound and text or ascii to the other of the participator computers ~~text or ascii~~.

59. (currently amended) The method of claim 170, wherein said step of arbitrating is carried out with ~~said sound and~~ said graphic and said pointer-triggered message and further comprising a human communication sound ~~communication~~.

60. (currently amended) The method of claim 170, wherein said step of arbitrating is carried out with said pointer-triggered message ~~communication~~, and wherein said step of arbitrating includes arbitrating to determine which of the participator computers can communicate text or ascii to the other of the participator computers ~~text or ascii~~.

61. (currently amended) The method of claim 170, wherein said step of arbitrating ~~is carried out with said step of arbitrating~~ includes arbitrating to determine which of the participator computers can communicate text or ascii to the other of the participator computers ~~text or ascii~~.

62. (currently amended) The method of claim 170, wherein said step of arbitrating is carried out with said pointer-triggered ~~communication~~ message.

63. (currently amended) The method of claim 170, wherein said step of arbitrating is carried out with ~~said sound and~~ said graphic, and wherein said step of arbitrating includes arbitrating to determine which of the participator computers can communicate a human communication sound and text or ascii to the other of the participator computers ~~text or ascii~~.

64. (previously amended) The method of claim 1, further including the step of: determining a user's age corresponding to said user identity.

65. (previously amended) The method of claim 2, further including the step of:
determining a user's age corresponding to said user identity.

66. (previously amended) The method of claim 3, further including the step of:
determining a user's age corresponding to said user identity.

67. (previously amended) The method of claim 4, further including the step of:
determining a user's age corresponding to said user identity.

68. (previously amended) The method of claim 5, further including the step of:
determining a user's age corresponding to said user identity.

69. (previously amended) The method of claim 6, further including the step of:
determining a user's age corresponding to said user identity.

70. (previously amended) The method of claim 7, further including the step of:
determining a user's age corresponding to said user identity.

71. (previously amended) The method of claim 8, further including the step of:
determining a user's age corresponding to said user identity.

72. (previously amended) The method of claim 9, further including the step of:
determining a user's age corresponding to said user identity.

73. (previously amended) The method of claim 10, further including the step of:
determining a user's age corresponding to said user identity.

74. (previously amended) The method of claim 11, further including the step of:
determining a user's age corresponding to said user identity.

75. (previously amended) The method of claim 12, further including the step of:
determining a user's age corresponding to said user identity.

76. (previously amended) The method of claim 13, further including the step of:
determining a user's age corresponding to said user identity.

77. (previously amended) The method of claim 14, further including the step of:
determining a user's age corresponding to said user identity.

78. (previously amended) The method of claim 15, further including the step of:
determining a user's age corresponding to said user identity.

79. (previously amended) The method of claim 16, further including the step of:

determining a user's age corresponding to said user identity.

80. (previously amended) The method of claim 17, further including the step of:
determining a user's age corresponding to said user identity.

81. (previously amended) The method of claim 18, further including the step of:
determining a user's age corresponding to said user identity.

82. (previously amended) The method of claim 19, further including the step of:
determining a user's age corresponding to said user identity.

83. (previously amended) The method of claim 20, further including the step of:
determining a user's age corresponding to said user identity.

84. (previously amended) The method of claim 21, further including the step of:
determining a user's age corresponding to said user identity.

85. (previously amended) The method of claim 22, further including the step of:
determining a user's age corresponding to said user identity.

86. (previously amended) The method of claim 23, further including the step of:
determining a user's age corresponding to said user identity.

87. (previously amended) The method of claim 24, further including the step of:
determining a user's age corresponding to said user identity.

88. (previously amended) The method of claim 25, further including the step of:
determining a user's age corresponding to said user identity.

89. (previously amended) The method of claim 26, further including the step of:

determining a user's age corresponding to said user identity.

90. (previously amended) The method of claim 27, further including the step of:
determining a user's age corresponding to said user identity.

91. (previously amended) The method of claim 28, further including the step of:
determining a user's age corresponding to said user identity.

92. (previously amended) The method of claim 29, further including the step of:
determining a user's age corresponding to said user identity.

93. (previously amended) The method of claim 30, further including the step of:
determining a user's age corresponding to said user identity.

94. (previously amended) The method of claim 31, further including the step of:
determining a user's age corresponding to said user identity.

95. (previously amended) The method of claim 32, further including the step of:
determining a user's age corresponding to said user identity.

96. (previously amended) The method of claim 33, further including the step of:
determining a user's age corresponding to said user identity.

97. (previously amended) The method of claim 34, further including the step of:
determining a user's age corresponding to said user identity.

98. (previously amended) The method of claim 35, further including the step of:
determining a user's age corresponding to said user identity.

99. (previously amended) The method of claim 36, further including the step of:
determining a user's age corresponding to said user identity.

100. (previously amended) The method of claim 37, further including the step of:
determining a user's age corresponding to said user identity.

101. (previously amended) The method of claim 38, further including the step of:
determining a user's age corresponding to said user identity.

102. (previously amended) The method of claim 39, further including the step of:
determining a user's age corresponding to said user identity.

103. (previously amended) The method of claim 40, further including the step of:
determining a user's age corresponding to said user identity.

104. (previously amended) The method of claim 41, further including the step of:
determining a user's age corresponding to said user identity.

105. (previously amended) The method of claim 42, further including the step of:
determining a user's age corresponding to said user identity.

106. (previously amended) The method of claim 43, further including the step of:
determining a user's age corresponding to said user identity.

107. (previously amended) The method of claim 44, further including the step of:
determining a user's age corresponding to said user identity.

108. (previously amended) The method of claim 45, further including the step of:
determining a user's age corresponding to said user identity.

109. (previously amended) The method of claim 46, further including the step of:
determining a user's age corresponding to said user identity.

110. (previously amended) The method of claim 47, further including the step of:
determining a user's age corresponding to said user identity.

111. (previously amended) The method of claim 48, further including the step of:
determining a user's age corresponding to said user identity.

112. (previously amended) The method of claim 49, further including the step of:
determining a user's age corresponding to said user identity.

113. (previously amended) The method of claim 50, further including the step of:
determining a user's age corresponding to said user identity.

114. (previously amended) The method of claim 51, further including the step of:

determining a user's age corresponding to said user identity.

115. (previously amended) The method of claim 52, further including the step of:
determining a user's age corresponding to said user identity.

116. (previously amended) The method of claim 53, further including the step of:
determining a user's age corresponding to said user identity.

117. (previously amended) The method of claim 54, further including the step of:
determining a user's age corresponding to said user identity.

118. (previously amended) The method of claim 55, further including the step of:
determining a user's age corresponding to said user identity.

119. (previously amended) The method of claim 56, further including the step of:
determining a user's age corresponding to said user identity.

120. (previously amended) The method of claim 57, further including the step of:
determining a user's age corresponding to said user identity.

121. (previously amended) The method of claim 58, further including the step of:
determining a user's age corresponding to said user identity.

122. (previously amended) The method of claim 59, further including the step of:
determining a user's age corresponding to said user identity.

123. (previously amended) The method of claim 60, further including the step of:
determining a user's age corresponding to said user identity.

124. (previously amended) The method of claim 61, further including the step of:
determining a user's age corresponding to said user identity.

125. (previously amended) The method of claim 62, further including the step of:
determining a user's age corresponding to said user identity.

126. (previously amended) The method of claim 63, further including the step of:
determining a user's age corresponding to said user identity.

I 1

127. (currently amended) The method of claim 1, wherein the step of arbitrating
includes authorizing a moderator for said communications.

128. (currently amended) The method of claim 2, wherein the step of
arbitrating includes authorizing a moderator for said communications.

129. (currently amended) The method of claim 3, wherein the step of
arbitrating includes authorizing a moderator for said communications.

130. (currently amended) The method of claim 4, wherein the step of
arbitrating includes authorizing a moderator for said communications.

131. (currently amended) The method of claim 5, wherein the step of arbitrating includes authorizing a moderator for said communications.

132. (currently amended) The method of claim 6, wherein the step of arbitrating includes authorizing a moderator for said communications.

133. (currently amended) The method of claim 7, wherein the step of arbitrating includes authorizing a moderator for said communications.

134. (currently amended) The method of claim 8, wherein the step of arbitrating includes authorizing a moderator for said communications.

135. (currently amended) The method of claim 9, wherein the step of arbitrating includes authorizing a moderator for said communications.

136. (currently amended) The method of claim 10, wherein the step of arbitrating includes authorizing a moderator for said communications.

137. (currently amended) The method of claim 11, wherein the step of arbitrating includes authorizing a moderator for said communications.

138. (currently amended) The method of claim 12, wherein the step of arbitrating includes authorizing a moderator for said communications.

139. (currently amended) The method of claim 13, wherein the step of

arbitrating includes authorizing a moderator for said communications.

140. (currently amended) The method of claim 14, wherein the step of arbitrating includes authorizing a moderator for said communications.

141. (currently amended) The method of claim 15, wherein the step of arbitrating includes authorizing a moderator for said communications.

142. (currently amended) The method of claim 16, wherein the step of arbitrating includes authorizing a moderator for said communications.

143. (currently amended) The method of claim 17, wherein the step of arbitrating includes authorizing a moderator for said communications.

144. (currently amended) The method of claim 18, wherein the step of arbitrating includes authorizing a moderator for said communications.

145. (currently amended) The method of claim 19, wherein the step of arbitrating includes authorizing a moderator for said communications.

146. (currently amended) The method of claim 20, wherein the step of arbitrating includes authorizing a moderator for said communications.

147. (currently amended) The method of claim 21, wherein the step of arbitrating includes authorizing a moderator for said communications.

148. (currently amended) The method of claim 22, wherein the step of arbitrating includes authorizing a moderator for said communications.

149. (currently amended) The method of claim 23, wherein the step of arbitrating includes authorizing a moderator for said communications.

150. (currently amended) The method of claim 24, wherein the step of arbitrating includes authorizing a moderator for said communications.

151. (currently amended) The method of claim 25, wherein the step of arbitrating includes authorizing a moderator for said communications.

152. (currently amended) The method of claim 26, wherein the step of arbitrating includes authorizing a moderator for said communications.

153. (currently amended) The method of claim 27, wherein the step of arbitrating includes authorizing a moderator for said communications.

154. (currently amended) The method of claim 28, wherein the step of arbitrating includes authorizing a moderator for said communications.

155. (currently amended) The method of claim 29, wherein the step of arbitrating includes authorizing a moderator for said communications.

156. (currently amended) The method of claim 30, wherein the step of arbitrating includes authorizing a moderator for said communications.

157. (currently amended) The method of claim 31, wherein the step of arbitrating includes authorizing a moderator for said communications.

158. (currently amended) The method of claim 32, wherein the step of arbitrating includes authorizing a moderator for said communications.

I 159. (currently amended) The method of claim 170, ~~wherein~~ further including the step of ~~arbitrating includes~~ communicating a user image from said one of the plurality of the participator computers to the other of the participator computers.

160. (currently amended) The method of claim 41, ~~wherein~~ further including the step of ~~arbitrating includes~~ communicating a user image from said one of the plurality of the participator computers to the other of the participator computers.

161. (currently amended) The method of claim 42, ~~wherein~~ further including the step of ~~arbitrating includes~~ communicating a user image from said one of the plurality of the participator computers to the other of the participator computers.

162. (currently amended) The method of claim 46, ~~wherein~~ further including the step of ~~arbitrating includes~~ communicating a user image from said one of the plurality of the participator computers to the other of the participator computers.

163. (currently amended) The method of claim 61, ~~wherein~~ further including the step of ~~arbitrating includes~~ communicating a user image from said one of the plurality of the participator computers to the other of the participator computers.

164. (currently amended) The method of claim 1, further including the step of: communicating a user image from one member in the group to another member in the group.

165. (currently amended) A method ~~for~~ of using a computer system to distribute communication over an Internet network, the method including the steps of:

I \ obtaining a respective authenticated user identity from a controller computer over the Internet network for respective use on each of a plurality of participator computers, each said participator computer connected to an input device and to an output device;

programming the participator computers to enable the communication, including at least one of a ~~human~~ sound, a video, a graphic, or multimedia ~~a combination thereof~~;

connecting said participator computers to said Internet network;

using said authenticated user identity to communicate a pointer-triggered message from one of said participator computers to said controller computer and from said controller computer to an other of said participator computers; and

using said pointer-triggered message to receive the communication at the other of said participator computers in real time over the Internet network.

166. (currently amended) The method of claim 165, further including the step of: determining a user's age corresponding to said user identity.

167. (currently amended) The method of claim 165, wherein the step of programming is carried out with said communication including said video.

168. (currently amended) The method of claim 166, wherein the step of programming is carried out with said communication including said video.

169. (previously amended) The method of claim 165, further including the step of forming a chat channel over the Internet network, and arbitrating channel communications between said participator computers at said controller computer.

I
170. (currently amended) A method ~~for~~ of using computers to communicate over an Internet network, the method including the steps of:

connecting ~~one of~~ a controller computer with a plurality of participator computers, said connecting including connecting at least one of the plurality of participator computers with a the controller computer through the Internet network, each said participator computer connected to an input device and to an output device; and

arbitrating with the controller computer, in accordance with predefined rules including a test for an authenticated user identity ~~applied to said one of the plurality of participator computers~~, to determine which of the participator computers can communicate to an other of the participator computers over the Internet network in real time, ~~human sound, at least one of a~~ video, a graphic, or a pointer-triggered message, ~~or a combination thereof~~.

171. (previously amended) The method of claim 165, wherein said step of programming is carried out with said communication including said sound.

172. (previously amended) The method of claim 165, wherein said step of programming is carried out with said communication including said sound and said video.

173. (previously amended) The method of claim 166, wherein said step of programming is carried out with said communication including said sound.

174. (previously amended) The method of claim 166, wherein said step of programming is carried out with said communication including said sound and said video.

175. (currently amended) The method of claim 165, further including the step of ~~wherein sending includes~~ sending the communication as an out of band communication.

176. (previously amended) The method of claim 166, further including the step of:
communicating an asynchronous communication from said controller computer to
one of said participator computers.

177. (previously amended) The method of claim 165, further including the step of:
communicating an asynchronous communication from said controller computer to
one of said participator computers.

178. (previously amended) The method of claim 170, further including the step of:
communicating an asynchronous communication from said controller computer to
one of said participator computers.

179. (previously amended) The method of claim 5, further including the step of:

communicating a user image from one member in the group to another member in the group.

180. (previously amended) The method of claim 6, further including the step of: communicating a user image from one member in the group to another member in the group.

181. (previously amended) The method of claim 10, further including the step of: communicating a user image from one member in the group to another member in the group.

I/

182. (currently amended) The method of claim 23, further including the step of: _____ communicating a user image from one member in the group to another member in the group.

183. (previously added) The method of claim 1, further including the step of: communicating an asynchronous communication from said controller computer to one of said participator computers.

184. (previously added) The method of claim 1, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

185. (previously added) The method of claim 2, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and

content.

186. (previously added) The method of claim 3, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

187. (previously added) The method of claim 4, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

188. (previously added) The method of claim 5, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

189. (previously added) The method of claim 6, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

190. (previously added) The method of claim 7, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

191. (previously added) The method of claim 8, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

192. (previously added) The method of claim 9, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

193. (previously added) The method of claim 10, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

194. (previously added) The method of claim 11, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

195. (previously added) The method of claim 12, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

196. (previously added) The method of claim 13, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

197. (previously added) The method of claim 14, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

198. (previously added) The method of claim 15, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

199. (previously added) The method of claim 16, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

200. (previously added) The method of claim 17, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

201. (previously added) The method of claim 18, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

202. (previously added) The method of claim 19, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

203. (previously added) The method of claim 20, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

204. (previously added) The method of claim 21, wherein the step of

arbitrating includes censoring responsive to at least one of said user identity, group, and content.

205. (previously added) The method of claim 22, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

206. (previously added) The method of claim 23, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

207. (previously added) The method of claim 24, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

208. (previously added) The method of claim 25, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

209. (previously added) The method of claim 26, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

210. (previously added) The method of claim 27, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and

content.

211. (previously added) The method of claim 28, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

212. (previously added) The method of claim 29, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

I
213. (previously added) The method of claim 30, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

214. (previously added) The method of claim 31, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

215. (previously added) The method of claim 32, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

216. (previously added) The method of claim 1, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the

communications.

217. (previously added) The method of claim 2, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

218. (previously added) The method of claim 3, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

I / 219. (previously added) The method of claim 4, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

220. (previously added) The method of claim 5, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

221. (previously added) The method of claim 6, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the

communications.

222. (previously added) The method of claim 7, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

223. (previously added) The method of claim 8, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

I

224. (previously added) The method of claim 9, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

225. (previously added) The method of claim 10, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

226. (previously added) The method of claim 11, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the

communications.

227. (previously added) The method of claim 12, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

228. (previously added) The method of claim 13, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

I/

229. (previously added) The method of claim 14, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

230. (previously added) The method of claim 15, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

231. (previously added) The method of claim 16, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the

communications.

232. (previously added) The method of claim 17, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

233. (previously added) The method of claim 18, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

234. (previously added) The method of claim 19, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

235. (previously added) The method of claim 20, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

236. (previously added) The method of claim 21, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the

communications.

237. (previously added) The method of claim 22, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

238. (previously added) The method of claim 23, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

I
239. (previously added) The method of claim 24, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

240. (previously added) The method of claim 25, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

241. (previously added) The method of claim 26, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the

communications.

242. (previously added) The method of claim 27, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

243. (previously added) The method of claim 28, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

244. (previously added) The method of claim 29, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

245. (previously added) The method of claim 30, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

246. (previously added) The method of claim 31, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the

communications.

247. (previously added) The method of claim 32, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

248. (previously added) The method of claim 1, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

249. (previously added) The method of claim 2, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

250. (previously added) The method of claim 3, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

251. (previously added) The method of claim 4, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said

controller computer, between some of the group.

252. (previously added) The method of claim 5, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

253. (previously added) The method of claim 6, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

I

254. (previously added) The method of claim 7, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

255. (previously added) The method of claim 8, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

256. (previously added) The method of claim 9, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said

controller computer, between some of the group.

257. (previously added) The method of claim 10, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

258. (previously added) The method of claim 11, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

I

259. (previously added) The method of claim 12, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

260. (previously added) The method of claim 13, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

261. (previously added) The method of claim 14, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said

controller computer, between some of the group.

262. (previously added) The method of claim 15, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

263. (previously added) The method of claim 16, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

I'

264. (previously added) The method of claim 17, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

265. (previously added) The method of claim 18, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

266. (previously added) The method of claim 19, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said

controller computer, between some of the group.

267. (previously added) The method of claim 20, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

268. (previously added) The method of claim 21, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

269. (previously added) The method of claim 22, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

270. (previously added) The method of claim 23, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

271. (previously added) The method of claim 24, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said

controller computer, between some of the group.

272. (previously added) The method of claim 25, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

273. (previously added) The method of claim 26, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

I

274. (previously added) The method of claim 27, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

275. (previously added) The method of claim 28, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

276. (previously added) The method of claim 29, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said

controller computer, between some of the group.

277. (previously added) The method of claim 30, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

278. (previously added) The method of claim 31, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

I /

279. (previously added) The method of claim 32, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

280. (previously added) The method of claim 170, further including the step of:

determining a user's age corresponding to said user identity.

281. (previously added) The method of claim 170, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

282. (previously added) The method of claim 170, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

283. (previously added) The method of claim 170, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

I 284. (currently amended) The method of claim 170, ~~wherein~~ further including the step of ~~arbitrating includes:~~

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

285. (previously added) The method of claim 33, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

286. (previously added) The method of claim 34, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of

computers.

287. (previously added) The method of claim 35, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

288. (previously added) The method of claim 36, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

I

289. (previously added) The method of claim 37, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

290. (previously added) The method of claim 38, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

291. (previously added) The method of claim 39, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of

computers.

292. (previously added) The method of claim 40, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

293. (previously added) The method of claim 41, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

I'
294. (previously added) The method of claim 42, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

295. (previously added) The method of claim 43, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

296. (previously added) The method of claim 44, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of

computers.

297. (previously added) The method of claim 45, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

298. (previously added) The method of claim 46, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

I'
299. (previously added) The method of claim 47, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

300. (previously added) The method of claim 48, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

301. (previously added) The method of claim 49, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of

computers.

302. (previously added) The method of claim 50, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

303. (previously added) The method of claim 51, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

I'

304. (previously added) The method of claim 52, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

305. (previously added) The method of claim 53, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

306. (previously added) The method of claim 54, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of

computers.

307. (previously added) The method of claim 55, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

308. (previously added) The method of claim 56, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

I

309. (previously added) The method of claim 57, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

310. (previously added) The method of claim 58, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

311. (previously added) The method of claim 59, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of

computers.

312. (previously added) The method of claim 60, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

313. (previously added) The method of claim 61, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

I

314. (previously added) The method of claim 62, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

315. (previously added) The method of claim 63, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

316. (previously added) The method of claim 33, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

317. (previously added) The method of claim 34, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

318. (previously added) The method of claim 35, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

319. (previously added) The method of claim 36, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

320. (previously added) The method of claim 37, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

321. (previously added) The method of claim 38, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

322. (previously added) The method of claim 39, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

323. (previously added) The method of claim 40, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

324. (previously added) The method of claim 41, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

325. (previously added) The method of claim 42, wherein the step of arbitrating

includes censoring responsive to at least one of said user identity, group, and content.

326. (previously added) The method of claim 43, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

327. (previously added) The method of claim 44, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

328. (previously added) The method of claim 45, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

329. (previously added) The method of claim 46, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

330. (previously added) The method of claim 47, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

331. (previously added) The method of claim 48, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

332. (previously added) The method of claim 49, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

333. (previously added) The method of claim 50, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

334. (previously added) The method of claim 51, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

335. (previously added) The method of claim 52, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

336. (previously added) The method of claim 53, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

I 337. (previously added) The method of claim 54, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

338. (previously added) The method of claim 55, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

339. (previously added) The method of claim 56, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

340. (previously added) The method of claim 57, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

341. (previously added) The method of claim 58, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

342. (previously added) The method of claim 59, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

343. (previously added) The method of claim 60, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

344. (previously added) The method of claim 61, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

345. (previously added) The method of claim 62, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

I
346. (previously added) The method of claim 63, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

347. (previously added) The method of claim 33, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

348. (previously added) The method of claim 34, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

349. (previously added) The method of claim 35, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

350. (previously added) The method of claim 36, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

351. (previously added) The method of claim 37, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

352. (previously added) The method of claim 38, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

353. (previously added) The method of claim 39, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

354. (previously added) The method of claim 40, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

355. (previously added) The method of claim 41, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

X

356. (previously added) The method of claim 42, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

357. (previously added) The method of claim 43, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

358. (previously added) The method of claim 44, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

359. (previously added) The method of claim 45, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

360. (previously added) The method of claim 46, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

I 361. (previously added) The method of claim 47, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

362. (previously added) The method of claim 48, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

363. (previously added) The method of claim 49, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

364. (previously added) The method of claim 50, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

365. (previously added) The method of claim 51, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

366. (previously added)

The method of claim 52, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

367. (previously added) The method of claim 53, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

368. (previously added) The method of claim 54, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

369. (previously added) The method of claim 55, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

370. (previously added) The method of claim 56, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

X/

371. (previously added) The method of claim 57, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

372. (previously added) The method of claim 58, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

373. (previously added) The method of claim 59, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

374. (previously added) The method of claim 60, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

375. (previously added) The method of claim 61, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

376. (previously added) The method of claim 62, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

377. (previously added) The method of claim 63, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

378. (currently amended) The method of claim 33, ~~wherein~~ further including the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication

window capability.

379. (currently amended) The method of claim 34, ~~wherein~~ further including
the step of ~~arbitrating includes~~:

providing group communications capability, with said controller computer, to
handle communications between the one of the plurality of computers and the other of the
plurality of computers, said group communications capability including private communication
window capability.

380. (currently amended) The method of claim 35, ~~wherein~~ further including
the step of ~~arbitrating includes~~:

providing group communications capability, with said controller computer, to
handle communications between the one of the plurality of computers and the other of the
plurality of computers, said group communications capability including private communication
window capability.

381. (currently amended) The method of claim 36, ~~wherein~~ further including
the step of ~~arbitrating includes~~:

providing group communications capability, with said controller computer, to
handle communications between the one of the plurality of computers and the other of the
plurality of computers, said group communications capability including private communication
window capability.

382. (currently amended) The method of claim 37, ~~wherein~~ further including
the step of ~~arbitrating includes~~:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

383. (currently amended) The method of claim 38, ~~wherein~~ further including the step of ~~arbitrating includes~~:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

384. (currently amended) The method of claim 39, ~~wherein~~ further including the step of ~~arbitrating includes~~:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

385. (currently amended) The method of claim 40, ~~wherein~~ further including the step of ~~arbitrating includes~~:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

386. (currently amended) The method of claim 41, ~~wherein~~ further including
the step of ~~arbitrating includes~~:

providing group communications capability, with said controller computer, to
handle communications between the one of the plurality of computers and the other of the
plurality of computers, said group communications capability including private communication
window capability.

387. (currently amended) The method of claim 42, ~~wherein~~ further including
the step of ~~arbitrating includes~~:

providing group communications capability, with said controller computer, to
handle communications between the one of the plurality of computers and the other of the
plurality of computers, said group communications capability including private communication
window capability.

388. (currently amended) The method of claim 43, ~~wherein~~ further including
the step of ~~arbitrating includes~~:

providing group communications capability, with said controller computer, to
handle communications between the one of the plurality of computers and the other of the
plurality of computers, said group communications capability including private communication
window capability.

389. (currently amended) The method of claim 44, ~~wherein~~ further including
the step of ~~arbitrating includes~~:

providing group communications capability, with said controller computer, to

handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

390. (currently amended) The method of claim 45, wherein further including the step of ~~arbitrating includes~~:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

1
X

391. (currently amended) The method of claim 46, wherein further including the step of ~~arbitrating includes~~:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

392. (currently amended) The method of claim 47, wherein further including the step of ~~arbitrating includes~~:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

393. (currently amended) The method of claim 48, ~~wherein~~ further including
the step of ~~arbitrating includes~~:

providing group communications capability, with said controller computer, to
handle communications between the one of the plurality of computers and the other of the
plurality of computers, said group communications capability including private communication
window capability.

394. (currently amended) The method of claim 49, ~~wherein~~ further including
the step of ~~arbitrating includes~~:

providing group communications capability, with said controller computer, to
handle communications between the one of the plurality of computers and the other of the
plurality of computers, said group communications capability including private communication
window capability.

395. (currently amended) The method of claim 50, ~~wherein~~ further including
the step of ~~arbitrating includes~~:

providing group communications capability, with said controller computer, to
handle communications between the one of the plurality of computers and the other of the
plurality of computers, said group communications capability including private communication
window capability.

396. (currently amended) The method of claim 51, ~~wherein~~ further including
the step of ~~arbitrating includes~~:

providing group communications capability, with said controller computer, to
handle communications between the one of the plurality of computers and the other of the

plurality of computers, said group communications capability including private communication window capability.

397. (currently amended) The method of claim 52, wherein further including the step of ~~arbitrating includes~~:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

I
398. (currently amended) The method of claim 53, wherein further including the step of ~~arbitrating includes~~:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

399. (currently amended) The method of claim 54, wherein further including the step of ~~arbitrating includes~~:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

400. (currently amended) The method of claim 55, wherein further including

the step of ~~arbitrating~~ includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

401. (currently amended) The method of claim 56, ~~wherein~~ further including the step of ~~arbitrating~~ includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

402. (currently amended) The method of claim 57, ~~wherein~~ further including the step of ~~arbitrating~~ includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

403. (currently amended) The method of claim 58, ~~wherein~~ further including the step of ~~arbitrating~~ includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication

window capability.

404. (currently amended) The method of claim 59, wherein further including
the step of ~~arbitrating~~ includes:

providing group communications capability, with said controller computer, to
handle communications between the one of the plurality of computers and the other of the
plurality of computers, said group communications capability including private communication
window capability.

405. (currently amended) The method of claim 60, wherein further including
the step of ~~arbitrating~~ includes:

providing group communications capability, with said controller computer, to
handle communications between the one of the plurality of computers and the other of the
plurality of computers, said group communications capability including private communication
window capability.

406. (currently amended) The method of claim 61, wherein further including
the step of ~~arbitrating~~ includes:

providing group communications capability, with said controller computer, to
handle communications between the one of the plurality of computers and the other of the
plurality of computers, said group communications capability including private communication
window capability.

407. (currently amended) The method of claim 62, wherein further including
the step of ~~arbitrating~~ includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

408. (currently amended) The method of claim 63, ~~wherein~~ further including the step of ~~arbitrating includes~~:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

I 1
409. (currently amended) A method ~~for~~ of using a computer system to ~~distribute communication~~ communicate over an Internet network, the method including the steps of:

connecting a plurality of participator computers with a controller computer through the Internet network, each said participator computer connected to an input device and to an output device;

arbitrating with the controller computer, in accordance with predefined rules including a test for an authenticated user identity, to respectively determine which ones of the participator computers can ~~send and receive~~ communicate communications in real time over the Internet network; ~~and, wherein said authorizing includes~~

providing a member associated image and respective member identity information under control of said controller computer to the ones of the participator computers.

410. (previously added) The method of claim 409, further including the step of:

determining a user's age corresponding to said user identity.

411. (previously added) The method of claim 410, further including the step of:
communicating, with said controller computer, an asynchronous message from
one of the participator computers to another of the participator computers.

412. (previously added) The method of claim 410, further including the step of
censoring, with said controller computer, unwanted communication from a member.

413. (currently amended) The method of claim 410, wherein the step of
arbitrating includes distributing chat communications to a chat group real time over the Internet
network.

414. (previously added) The method of claim 413, further including the step of
providing, with said controller computer, private chat capability to the participator computers.

415. (previously added) The method of claim 413, further including the step of
providing, with said controller computer, private communication window capability to the
participator computers.

416. (currently amended) The method of claim 410, further including the step of
communicating, with said controller computer, human communication sound to the participator
computers.

417. (previously added) The method of claim 410, further including the step of

providing, with said controller computer, video to the participator computers.

418. (previously added) The method of claim 416, further including the step of providing, with said controller computer, video to the participator computers.

419. (previously added) The method of claim 410, wherein the step of arbitrating is carried out with some of said communications including text.

420. (currently amended) The method of claim 410, wherein the step of arbitrating is carried out with some of ~~one~~ said communications ~~is~~ communicated out of band.

421. (currently amended) The method of claim 410, wherein the step of arbitrating is carried out with some of said communications ~~are~~ including multimedia media messages.

422. (previously added) The method of claim 409, further including the step of controlling, with said controller computer, invisible viewing of the communications.

423. (previously added) The method of claim 410, further including the step of controlling, with said controller computer, invisible viewing of the communications.

424. (previously added) The method of claim 411, further including the step of controlling, with said controller computer, invisible viewing of the communications.

425. (previously added) The method of claim 412, further including the step

of controlling, with said controller computer, invisible viewing of the communications.

426. (previously added) The method of claim 413, further including the step of controlling, with said controller computer, invisible viewing of the communications.

427. (previously added) The method of claim 414, further including the step of controlling, with said controller computer, invisible viewing of the communications.

428. (previously added) The method of claim 415, further including the step of controlling, with said controller computer, invisible viewing of the communications.

429. (previously added) The method of claim 416, further including the step of controlling, with said controller computer, invisible viewing of the communications.

430. (previously added) The method of claim 417, further including the step of controlling, with said controller computer, invisible viewing of the communications.

431. (previously added) The method of claim 418, further including the step of controlling, with said controller computer, invisible viewing of the communications.

432. (previously added) The method of claim 419, further including the step of controlling, with said controller computer, invisible viewing of the communications.

433. (previously added) The method of claim 420, further including the step of controlling, with said controller computer, invisible viewing of the communications.

434. (previously added) The method of claim 421, further including the step of controlling, with said controller computer, invisible viewing of the communications.

435. (new) A system using computers to communicate over an Internet network, the system including:

I
a plurality of participator computers connected with a controller computer through the Internet network, each said participator computer connected to an input device and to an output device, the controller computer programmed to carry out the step of arbitrating, in accordance with predefined rules including a test for an authenticated user identity, to determine which ones of the participator computers can form a group to communicate communications in real time over the Internet network, wherein one of said communications includes at least one of a video, a graphic, or a pointer-triggered message.

436. (new) The system of claim 435, wherein one of said communications comprises said pointer-triggered message.

437. (new) The system of claim 435, wherein one of said communications comprises said pointer-triggered message and said graphic and further comprises a human communication sound.

438. (new) The system of claim 435, wherein one of said communications comprises said pointer-triggered message and said video and said graphic.

439. (new) The system of claim 435, wherein one of said communications

further comprises a human communication sound.

440. (new) The system of claim 435, wherein one of said communications comprises said video and further comprises a human communication sound.

441. (new) The system of claim 435, wherein one of said communications comprises said graphic and further comprises a human communication sound.

442. (new) The system of claim 435, wherein one of said communications comprises said pointer-triggered message and further comprises a human communication sound.

443. (new) The system of claim 435, wherein one of said communications further comprises a human communication sound, and wherein some of said communications include text or ascii.

444. (new) The system of claim 435, wherein one of said communications comprises said video.

445. (new) The system of claim 435, wherein one of said communications comprises said video and said graphic.

446. (new) The system of claim 435, wherein one of said communications comprises said video and said pointer-triggered message.

447. (new) The system of claim 435, wherein one of said communications comprises said video, and wherein some of said communications include text or ascii.

448. (new) The system of claim 435, wherein one of said communications comprises said graphic.

449. (new) The system of claim 435, wherein one of said communications comprises said graphic and said pointer-triggered message.

450. (new) The system of claim 435, wherein one of said communications comprises said graphic, and wherein some of said communications include text or ascii.

451. (new) The system of claim 435, wherein one of said communications comprises said video and said graphic and further comprises a human communication sound.

452. (new) The system of claim 435, wherein one of said communications comprises said video and said pointer-triggered message and further comprises a human communication sound.

453. (new) The system of claim 435, wherein one of said communications comprises said vide and further comprises a human communication sound, and wherein some of said communications include text or ascii.

454. (new) The system of claim 435, wherein one of said communications comprises said video and said graphic and said pointer-triggered message and further

comprises a human communication sound.

455. (new) The system of claim 435, wherein one of said communications comprises said video and said pointer-triggered message and further comprises a human communication sound, and wherein some of said communications include text or ascii.

456. (new) The system of claim 435, wherein one of said communications comprises said video and said graphic and said pointer-triggered message and further comprises a human communication sound, and wherein some of said communications include text or ascii.

457. (new) The system of claim 435, wherein some of said communications include text or ascii.

458. (new) The system of claim 435, wherein one of said communications comprises said graphic and further comprises a human communication sound, and wherein some of said communications include text or ascii.

459. (new) The system of claim 435, wherein one of said communications comprises said graphic and said video, and wherein some of said communications include text or ascii.

460. (new) The system of claim 435, wherein one of said communications comprises said pointer-triggered message, and wherein some of said communications include text or ascii.

461. (new) The system of claim 435, wherein one of said communications comprises said pointer-triggered message and said video, and wherein some of said communications include text or ascii.

462. (new) The system of claim 435, wherein one of said communications comprises video and said graphic and further comprises a human communication sound, and wherein some of said communications include text or ascii.

I 463. (new) The system of claim 435, wherein one of said communications comprises said pointer-triggered message and further comprises a human communication sound, and wherein some of said communications include text or ascii.

464. (new) The system of claim 435, wherein one of said communications comprises said pointer-triggered message and said graphic and further comprises a human communication sound, and wherein some of said communications include text or ascii.

465. (new) The system of claim 435, wherein one of said communications comprises video and said graphic and said pointer-triggered message, and wherein some of said communications include text or ascii.

466. (new) The system of claim 435, wherein one of said communications comprises said graphic and said pointer-triggered message, and wherein some of said communications include text or ascii.

467. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said pointer-triggered message, and wherein said controller computer is programmed to carry out the step of arbitrating to determine which of the participator computers can communicate a human communication sound, and which of the participator computers can communicate text or ascii, to the other of the participator computers.

468. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said pointer-triggered message and said graphic, and wherein said controller computer is programmed to carry out the step of arbitrating to determine which of the participator computers can communicate test or ascii, to the other of the participator computers.

469. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said video and said graphic, and wherein said controller computer is programmed to carry out the step of arbitrating to determine which of the participator computers can communicate a human communication sound, and which of the participator computers can communicate text or ascii, to the other of the participator computers.

470. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said graphic and said pointer-triggered message, and wherein said controller computer is programmed to carry out the step of arbitrating to determine which of the participator computers can communicate a human communication sound, and which of the participator computers can communicate text or ascii, to the other of the participator computers.

471. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said graphic and said video, and wherein said controller computer is programmed to

carry out the step of arbitrating to determine which of the participator computers can communicate text or ascii to the other of the participator computers.

472. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said video and said graphic and said pointer-triggered message, and wherein said controller computer is programmed to carry out the step of arbitrating to determine which of the participator computers can communicate text or ascii to the other of the participator computers.

473. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said video and said pointer-triggered message, and wherein said controller computer is programmed to carry out the step of arbitrating to determine which of the participator computers can communicate text or ascii to the other of the participator computers.

474. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said video and said graphic and said pointer-triggered message.

475. (new) The system of claim ~~604~~⁶⁰⁵, wherein said controller computer is programmed to carry out the step of arbitrating to determine which of the participator computers can communicate a human communication sound to the other of the personal computers.

476. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said video, and said controller computer is programmed to carry out the step of arbitrating to determine which of the participator computers can communicate a human communication sound to the other of the personal computers.

477. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said graphic, and said controller computer is programmed to carry out the step of arbitrating to determine which of the participator computers can communicate a human communication sound to the other of the personal computers.

478. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said pointer-triggered message, and said controller computer is programmed to carry out the step of arbitrating to determine which of the participator computers can communicate a human communication sound to the other of the personal computers.

479. (new) The system of claim ~~604~~⁶⁰⁵, wherein said controller computer is programmed to carry out the step of arbitrating to determine which of the participator computers can communicate a human communication sound, and which of the participator computers can communicate text or ascii, to the other of the participator computers.

480. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said video.

481. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said video and said graphic.

482. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said video and said pointer-triggered message.

483. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried

out with said video, and wherein said controller computer is programmed to carry out the step of arbitrating to determine which of the participator computers can communicate text or ascii to the other of the participator computers.

484. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said graphic.

485. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said graphic and said pointer-triggered message.

486. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said graphic, and wherein said controller computer is programmed to carry out the step of arbitrating to determine which of the participator computers can communicate text or ascii to the other of the participator computers.

487. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said video and said graphic, and said controller computer is programmed to carry out the step of arbitrating to determine which of the participator computers can communicate a human communication sound to the other of the personal computers.

488. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said video and said pointer-triggered message, and said and said controller computer is programmed to carry out the step of arbitrating to determine which of the participator computers can communicate a human communication sound to the other of the personal computers .

489. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said video, and wherein said controller computer is programmed to carry out the step of arbitrating to determine which of the participator computers can communicate a human communication sound, and which of the participator computers can communicate text or ascii, to the other of the participator computers.

490. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said sound and said video and said graphic and said pointer-triggered message.

491. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said sound and said video and said pointer-triggered message, and wherein said controller computer is programmed to carry out the step of arbitrating to determine which of the participator computers can communicate text or ascii to the other of the participator computers.

492. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said video and said graphic and said pointer-triggered message, and wherein said controller computer is programmed to carry out the step of arbitrating to determine which of the participator computers can communicate a human communication sound, and which of the participator computers can communicate text or ascii, to the other of the participator computers.

493. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said graphic and said pointer-triggered message, and said controller computer is programmed to carry out the step of arbitrating to determine which of the participator computers can communicate a human communication sound to the other of the personal computers.

494. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said pointer-triggered message, and wherein said controller computer is programmed to carry out the step of arbitrating to determine which of the participator computers can communicate text or ascii to the other of the participator computers.

495. (new) The system of claim ~~604~~⁶⁰⁵, wherein said controller computer is programmed to carry out the step of arbitrating to determine which of the participator computers can communicate text or ascii to the other of the participator computers.

I
496. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with said pointer-triggered message.

497. (new) The system of claim ~~604~~⁶⁰⁵, wherein said step of arbitrating is carried out with graphic, and wherein said controller computer is programmed to carry out the step of arbitrating to determine which of the participator computers can communicate a human communication sound, and which of the participator computers can communicate text or ascii, to the other of the participator computers.

498. (new) The system of claim 435, wherein said controller computer is programmed to carry out the step of:
determining a user's age corresponding to said user identity.

499. (new) The system of claim 436, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

500. (new) The system of claim 437, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

501. (new) The system of claim 438, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

502. (new) The system of claim 439, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

503. (new) The system of claim 440, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

504. (new) The system of claim 441, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

505. (new) The system of claim 442, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

506. (new) The system of claim 443, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

507. (new) The system of claim 444, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

508. (new) The system of claim 445, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

509. (new) The system of claim 446, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

510. (new) The system of claim 447, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

511. (new) The system of claim 448, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

512. (new) The system of claim 449, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

513. (new) The system of claim 450, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

514. (new) The system of claim 451, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

515. (new) The system of claim 452, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

516. (new) The system of claim 453, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

517. (new) The system of claim 454, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

518. (new) The system of claim 455, wherein said controller computer is

programmed to carry out the step of:

determining a user's age corresponding to said user identity.

519. (new) The system of claim 456, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

520. (new) The system of claim 457, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

521. (new) The system of claim 458, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

522. (new) The system of claim 459, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

523. (new) The system of claim 460, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

524. (new) The system of claim 461, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

525. (new) The system of claim 462, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

526. (new) The system of claim 463, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

527. (new) The system of claim 464, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

528. (new) The system of claim 465, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

529. (new) The system of claim 466, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

530. (new) The system of claim 467, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

531. (new) The system of claim 468, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

532. (new) The system of claim 469, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

533. (new) The system of claim 470, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

534. (new) The system of claim 471, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

535. (new) The system of claim 472, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

536. (new) The system of claim 473, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

537. (new) The system of claim 474, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

538. (new) The system of claim 475, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

539. (new) The system of claim 476, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

540. (new) The system of claim 477, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

541. (new) The system of claim 478, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

542. (new) The system of claim 479, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

543. (new) The system of claim 480, wherein said controller computer is

programmed to carry out the step of:

determining a user's age corresponding to said user identity.

544. (new) The system of claim 481, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

545. (new) The system of claim 482, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

546. (new) The system of claim 483, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

547. (new) The system of claim 484, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

548. (new) The system of claim 485, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

549. (new) The system of claim 486, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

550. (new) The system of claim 487, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

551. (new) The system of claim 488, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

552. (new) The system of claim 489, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

553. (new) The system of claim 490, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

554. (new) The system of claim 491, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

555. (new) The system of claim 492, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

556. (new) The system of claim 493, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

557. (new) The system of claim 494, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

558. (new) The system of claim 495, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

559. (new) The system of claim 496, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

560. (new) The system of claim 497, wherein said controller computer is programmed to carry out the step of:

determining a user's age corresponding to said user identity.

561. (new) The system of claim 435, wherein the step of arbitrating includes authorizing a moderator for said communications.

562. (new) The system of claim 436, wherein the step of arbitrating includes

authorizing a moderator for said communications.

563. (new) The system of claim 437, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

564. (new) The system of claim 438, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

565. (new) The system of claim 439, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

566. (new) The system of claim 440, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

567. (new) The system of claim 441, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

568. (new) The system of claim 442, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

569. (new) The system of claim 443, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

570. (new) The system of claim 444, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

571. (currently amended) The system of claim 445, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

572. (new) The system of claim 446, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

573. (new) The system of claim 447, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

574. (new) The system of claim 448, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

575. (new) The system of claim 449, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

576. (new) The system of claim 450, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

577. (new) The system of claim 451, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

578. (new) The system of claim 452, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

579. (new) The system of claim 453, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

580. (new) The system of claim 454, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

581. (new) The system of claim 455, wherein said controller computer is

programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

582. (new) The system of claim 456, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

583. (new) The system of claim 457, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

584. (new) The system of claim 458, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

585. (new) The system of claim 459, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

586. (new) The system of claim 460, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

587. (new) The system of claim 461, wherein the step of arbitrating includes authorizing a moderator for said communications.

588. (new) The system of claim 462, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

589. (new) The system of claim 463, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

590. (new) The system of claim 464, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

591. (new) The system of claim 465, wherein said controller computer is programmed to carry out the step of arbitrating includes authorizing a moderator for said communications.

Rule
1.126

⁵⁹²
~~591~~. (new) The system of claim 466, wherein the step of arbitrating includes authorizing a moderator for said communications.

⁵⁹³
~~592~~. (new) The method of claim 165, wherein said step of programming is carried out with said sound being a human communication sound.

⁵⁹⁴
~~593~~. (new) The system of claim 604, wherein said controller computer is programmed to determine which of the participant computers can communicate a user image

to the other of the participator computers.

595

~~594~~. (new) The system of claim 475, wherein said controller computer is programmed to determine which of the participator computers can communicate a user image to the other of the participator computers.

596

~~595~~. (new) The system of claim 476, wherein said controller computer is programmed to determine which of the participator computers can communicate a user image to the other of the participator computers.

597

~~596~~. (new) The system of claim 480, wherein said controller computer is programmed to determine which of the participator computers can communicate a user image to the other of the participator computers.

598

~~597~~. (new) The system of claim 495, wherein said controller computer is programmed to determine which of the participator computers can communicate a user image to the other of the participator computers.

599

~~598~~. (new) The system of claim 435, wherein said controller computer is programmed to carry out the step of:

communicating a user image from one member in the group to another member in the group.

600

~~599~~. (new) A computer system distributing communication over an Internet network, the system including:

a controller computer programmed to carry out the step of obtaining a respective authenticated user identity over the Internet network, said user identity for respective use on each of a plurality of participator computers, each said participator computer connected to an input device and to an output device and connected to said Internet network, the participator computers programmed to enable the communication, including a sound, a video, a graphic, or multimedia; wherein:

said authenticated user identity is used to communicate a pointer-triggered message from one of said participator computers to said controller computer and from said controller computer to an other of said participator computers; and

said pointer-triggered message is used to receive the communication at the other of said participator computers in real time over the Internet network.

I
⁶⁰¹
~~600~~. (new) The system of claim ⁶⁰⁰~~599~~, wherein said controller computer is further programmed to carry out the step of:

determining a user's age corresponding to said user identity.

⁶⁰²
~~601~~. (new) The system of claim ⁶⁰⁰~~599~~, wherein communication includes the video.

⁶⁰³
~~602~~. (new) The system of claim ⁶⁰¹~~600~~, wherein communication includes the video.

⁶⁰⁴
~~603~~. (new) The system of claim ⁶⁰⁰~~599~~, wherein said controller computer is further programmed to carry out the step of forming a chat channel over the Internet network and arbitrating channel communications between said participator computers at said controller

computer.

⁶⁰⁵
~~604~~. (new) A system using computers to communicate over an Internet network, the system including:

a plurality of participator computers connected with a controller computer, at least one of said participator computers connected through the Internet network, each said participator computer connected to an input device and to an output device; wherein:

the controller computer is programmed to carry out the step of arbitrating, in accordance with predefined rules including a test for an authenticated user identity to determine which of the participator computers can communicate to an other of the participator computers over the Internet network in real time, at least one of a video, a graphic, or a pointer-triggered message.

⁶⁰⁶
~~605~~. (new) The system of claim ~~599~~⁶⁰⁰, wherein said communication including comprises said sound.

⁶⁰⁷
~~606~~. (new) The system of claim ~~599~~⁶⁰⁰, wherein said communication comprises said sound and said video.

⁶⁰⁸
~~607~~. (new) The system of claim ~~600~~⁶⁰¹, wherein said communication comprises said sound.

⁶⁰⁹
~~608~~. (new) The system of claim ~~600~~⁶⁰¹, wherein said communication comprises said and said video.

⁶¹⁰
~~609~~. (new) The system of claim ⁶⁰⁰~~599~~, wherein said controller computer is further programmed to carry out the step of sending the communication as an out of band communication.

⁶¹¹
~~610~~. (new) The system of claim ⁶⁰¹~~600~~, wherein said controller computer is further programmed to carry out the step of communicating an asynchronous communication from said controller computer to one of said participator computers.

⁶¹²
~~611~~. (new) The system ⁶⁰⁰~~599~~, wherein said controller computer is further programmed to carry out the step of communicating an asynchronous communication from said controller computer to one of said participator computers.

⁶¹³
~~612~~. (new) The system of claim ⁶⁰⁵~~604~~, wherein said controller computer is further programmed to carry out the step of communicating an asynchronous communication from said controller computer to one of said participator computers.

⁶¹⁴
~~613~~. (new) The system of claim 439, wherein said controller computer is further programmed to carry out the step of communicating a user image from one member in the group to another member in the group.

⁶¹⁵
~~614~~. (new) The system of claim 440, wherein said controller computer is further programmed to carry out the step of communicating a user image from one member in the group to another member in the group.

⁶¹⁶
~~615~~. (new) The system of claim 444, wherein said controller computer is

further programmed to carry out the step of communicating a user image from one member in the group to another member in the group.

⁶¹⁷
~~616~~. (new) The system of claim 457, wherein said controller computer is further programmed to carry out the step of communicating a user image from one member in the group to another member in the group.

⁶¹⁸
~~617~~. (new) The system of claim 435, wherein said controller computer is further programmed to carry out the step of communicating an asynchronous communication from said controller computer to one of said participator computers.

⁶¹⁹
~~618~~. (new) The system of claim 435, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁶²⁰
~~619~~. (new) The system of claim 436, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁶²¹
~~620~~. (new) The system of claim 437, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁶²²
~~621~~. (new) The system of claim 438, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁶²³
~~622~~. (new) The system of claim 439, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁶²⁴
~~623~~. (new) The system of claim 440, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁶²⁵
~~624~~. (new) The system of claim 441, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁶²⁶
~~625~~. (new) The system of claim 442, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

I
⁶²⁷
~~626~~. (new) The system of claim 443, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁶²⁸
~~627~~. (new) The system of claim 444, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁶²⁹
~~628~~. (new) The system of claim 445, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁶³⁰
~~629~~. (new) The system of claim 446, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁶³¹
~~630~~. (new) The system of claim 447, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

632

~~631~~. (new) The system of claim 448, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

633

~~632~~. (new) The system of claim 449, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

634

~~633~~. (new) The system of claim 450, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

635

~~634~~. (new) The system of claim 451, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

636

~~635~~. (new) The system of claim 452, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

637

~~636~~. (new) The system of claim 453, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

638

~~637~~. (new) The system of claim 454, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

639

~~638~~. (new) The system of claim 455, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

640

~~639~~. (new) The system of claim 456, wherein the step of arbitrating includes

censoring responsive to at least one of said user identity, group, and content.

641

~~640~~. (new) The system of claim 457, wherein the step of arbitrating includes

censoring responsive to at least one of said user identity, group, and content.

642

~~641~~. (new) The system of claim 458, wherein the step of arbitrating includes

censoring responsive to at least one of said user identity, group, and content.

643

~~642~~. (new) The system of claim 459, wherein the step of arbitrating includes

censoring responsive to at least one of said user identity, group, and content.

644

~~643~~. (new) The system of claim 460, wherein the step of arbitrating includes

censoring responsive to at least one of said user identity, group, and content.

645

~~644~~. (new) The system of claim 461, wherein the step of arbitrating includes

censoring responsive to at least one of said user identity, group, and content.

646

~~645~~. (new) The system of claim 462, wherein the step of arbitrating includes

censoring responsive to at least one of said user identity, group, and content.

647

~~646~~. (new) The system of claim 463, wherein the step of arbitrating includes

censoring responsive to at least one of said user identity, group, and content.

648

~~647~~. (new) The system of claim 464, wherein the step of arbitrating includes

censoring responsive to at least one of said user identity, group, and content.

⁶⁴⁹
~~648~~. (new) The system of claim 465, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁶⁵⁰
~~649~~. (new) The system of claim 466, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁶⁵¹
~~650~~. (new) The system of claim 435, wherein the step of arbitrating includes: authorizing, with said controller computer, invisible viewing of some of the communications.

⁶⁵²
~~651~~. (new) The system of claim 436, wherein the step of arbitrating includes: authorizing, with said controller computer, invisible viewing of some of the communications.

⁶⁵³
~~652~~. (new) The system of claim 437, wherein the step of arbitrating includes: authorizing, with said controller computer, invisible viewing of some of the communications.

⁶⁵⁴
~~653~~. (new) The system of claim 438, wherein the step of arbitrating includes: authorizing, with said controller computer, invisible viewing of some of the communications.

⁶⁵⁵
~~654~~. (new) The system of claim 439, wherein the step of arbitrating includes: authorizing, with said controller computer, invisible viewing of some of the

communications.

⁶⁵⁶
~~655~~. (new) The system of claim 440, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the
communications.

⁶⁵⁷
~~656~~. (new) The system of claim 441, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the
communications.

⁶⁵⁸
~~657~~. (new) The system of claim 442, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the
communications.

⁶⁵⁹
~~658~~. (new) The system of claim 443, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the
communications.

⁶⁶⁰
~~659~~. (new) The system of claim 444, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the
communications.

⁶⁶¹
~~660~~. (new) The system of claim 445, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the
communications.

662

~~661~~. (new) The system of claim 446, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the
communications.

663

~~662~~. (new) The system of claim 447, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the
communications.

664

~~663~~. (new) The system of claim 448, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the
communications.

665

~~664~~. (new) The system of claim 449, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the
communications.

666

~~665~~. (new) The system of claim 450, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the
communications.

667

~~666~~. (new) The system of claim 451, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the
communications.

668

~~667~~. (new) The system of claim 452, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the
communications.

669

~~668~~. (new) The system of claim 453, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the
communications.

670

~~669~~. (new) The system of claim 454, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the
communications.

I

671

~~670~~. (new) The system of claim 455, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the
communications.

672

~~671~~. (new) The system of claim 456, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the
communications.

673

~~672~~. (new) The system of claim 457, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the
communications.

674

~~673~~. (new) The system of claim 458, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

⁶⁷⁵
~~674~~. (new) The system of claim 459, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the communications.

⁶⁷⁶
~~675~~. (new) The system of claim 460, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the communications.

I'

⁶⁷⁷
~~676~~. (new) The system of claim 461, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the communications.

⁶⁷⁸
~~677~~. (new) The system of claim 462, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the communications.

⁶⁷⁹
~~678~~. (new) The system of claim 463, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the communications.

⁶⁸⁰
~~679~~. (new) The system of claim 464, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the

communications.

681
~~680~~

(new) The system of claim 465, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the
communications.

682
~~681~~

(new) The system of claim 466, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the
communications.

683

I'
~~682~~ (new) The system of claim 435, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

684

~~683~~ (new) The system of claim 436, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

685

~~684~~ (new) The system of claim 437, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

686

~~685~~ (new) The system of claim 438, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

687

~~686~~. (new) The system of claim 439, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

688

~~687~~. (new) The system of claim 440, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

689

1

~~688~~. (new) The system of claim 441, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

690

~~689~~. (new) The system of claim 442, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

691

~~690~~. (new) The system of claim 443, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

692

~~691~~. (new) The system of claim 444, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

⁶⁹³
~~692~~. (new) The system of claim 445, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

⁶⁹⁴
~~693~~. (new) The system of claim 446, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

⁶⁹⁵
~~694~~. (new) The system of claim 447, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

⁶⁹⁶
~~695~~. (new) The system of claim 448, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

⁶⁹⁷
~~696~~. (new) The system of claim 449, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

⁶⁹⁸
~~697~~. (new) The system of claim 450, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

⁶⁹⁹
~~698~~. (new) The system of claim 451, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

700

~~699~~. (new) The system of claim 452, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

701

~~700~~. (new) The system of claim 453, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

702

~~701~~. (new) The system of claim 454, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

703

~~702~~. (new) The system of claim 455, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

704

~~703~~. (new) The system of claim 456, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said controller computer, between some of the group.

705

~~704~~. (new) The system of claim 457, wherein the step of arbitrating includes:

providing private, real time communication over the Internet network, with said

controller computer, between some of the group.

706

~~705~~. (new) The system of claim 458, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

707

~~706~~. (new) The system of claim 459, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

708

~~707~~. (new) The system of claim 460, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

I'

709

~~708~~. (new) The system of claim 461, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

710

~~709~~. (new) The system of claim 462, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

711

~~710~~. (new) The system of claim 463, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

⁷¹²
~~711~~. (new) The system of claim 464, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

⁷¹³
~~712~~. (new) The system of claim 465, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

⁷¹⁴
~~713~~. (new) The system of claim 466, wherein the step of arbitrating includes:
providing private, real time communication over the Internet network, with said
controller computer, between some of the group.

⁷¹⁵
~~714~~. (new) The system of claim ⁶⁰⁵~~604~~, wherein said controller computer is
further programmed to carry out the step of:
determining a user's age corresponding to said user identity.

⁷¹⁶
~~715~~. (new) The system of claim ⁶⁰⁵~~604~~, wherein the step of arbitrating includes
authorizing a moderator for group communications including communications between the one
of the plurality of computers and the other of the plurality of computers.

⁷¹⁷
~~716~~. (new) The system of claim ⁶⁰⁵~~604~~, wherein the step of arbitrating includes
censoring responsive to at least one of said user identity, group, and content.

⁷¹⁸
~~717~~. (new) The system of claim ⁶⁰⁵~~604~~, wherein the step of arbitrating includes:

authorizing, with said controller computer, invisible viewing of some of the communications.

719

605

~~718~~. (new) The system of claim ~~604~~, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

720

~~719~~. (new) The system of claim 467, wherein the step of arbitrating includes

authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

I

721

~~720~~. (new) The system of claim 468, wherein the step of arbitrating includes

authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

722

~~721~~. (new) The system of claim 469, wherein the step of arbitrating includes

authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

723

~~722~~. (new) The system of claim 470, wherein the step of arbitrating includes

authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

⁷²⁴
~~723~~. (new) The system of claim 471, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

⁷²⁵
~~724~~. (new) The system of claim 472, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

⁷²⁶
~~725~~. (new) The system of claim 473, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

⁷²⁷
~~726~~. (new) The system of claim 474, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

⁷²⁸
~~727~~. (new) The system of claim 475, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

⁷²⁹
~~728~~. (new) The system of claim 476, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

⁷³⁰
~~729~~. (new) The system of claim 477, wherein the step of arbitrating includes

authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

731

~~730~~. (new) The system of claim 478, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

732

~~731~~. (new) The system of claim 479, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

733

~~732~~. (new) The system of claim 480, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

I

734

~~733~~. (new) The system of claim 481, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

735

~~734~~. (new) The system of claim 482, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

736

~~735~~. (new) The system of claim 483, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one

of the plurality of computers and the other of the plurality of computers.

⁷³⁷
~~736~~

(new) The system of claim 484, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

⁷³⁸
~~737~~

(new) The system of claim 485, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

⁷³⁹
~~738~~

(new) The system of claim 486, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

I'

⁷⁴⁰
~~739~~

(new) The system of claim 487, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

⁷⁴¹
~~740~~

(new) The system of claim 488, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

⁷⁴²
~~741~~

(new) The system of claim 489, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

743

~~742~~. (new) The system of claim 490, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

744

~~743~~. (new) The system of claim 491, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

745

~~744~~. (new) The system of claim 492, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

I

746

~~745~~. (new) The system of claim 493, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

747

~~746~~. (new) The system of claim 494, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

748

~~747~~. (new) The system of claim 495, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

⁷⁴⁹
~~748~~. (new) The system of claim 496, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

⁷⁵⁰
~~749~~. (new) The system of claim 497, wherein the step of arbitrating includes authorizing a moderator for group communications including communications between the one of the plurality of computers and the other of the plurality of computers.

⁷⁵¹
~~750~~. (new) The system of claim 467, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

I
⁷⁵²
~~751~~. (new) The system of claim 468, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁷⁵³
~~752~~. (new) The system of claim 469, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁷⁵⁴
~~753~~. (new) The system of claim 470, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁷⁵⁵
~~754~~. (new) The system of claim 471, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁷⁵⁶
~~755~~. (new) The system of claim 472, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁷⁵⁷
~~756~~. (new) The system of claim 473, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁷⁵⁸
~~757~~. (new) The system of claim 474, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁷⁵⁹
~~758~~. (new) The system of claim 475, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁷⁶⁰
~~759~~. (new) The system of claim 476, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁷⁶¹
~~760~~. (new) The system of claim 477, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁷⁶²
~~761~~. (new) The system of claim 478, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁷⁶³
~~762~~. (new) The system of claim 479, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁷⁶⁴
~~763~~. (new) The system of claim 480, wherein the step of arbitrating includes censoring responsive to at least one of said user identity, group, and content.

⁷⁶⁵

~~811~~. (new) The system of claim 497, wherein the step of arbitrating includes:
authorizing, with said controller computer, invisible viewing of some of the
communications.

813

~~812~~. (new) The system of claim 467, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

814

~~813~~. (new) The system of claim 468, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

815

~~814~~. (new) The system of claim 469, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

816

~~815~~. (new) The system of claim 470, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

817

~~816~~. (new) The system of claim 471, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

~~817~~⁸¹⁸

817. (new) The system of claim 472, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

~~818~~⁸¹⁹

818. (new) The system of claim 473, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

~~819~~⁸²⁰

819. (new) The system of claim 474, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

~~820~~⁸²¹

820. (new) The system of claim 475, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to

handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

822

~~821.~~ (new) The system of claim 476, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

823

~~822.~~ (new) The system of claim 477, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

824

~~823.~~ (new) The system of claim 478, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

825

~~824.~~ (new) The system of claim 479, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the

plurality of computers, said group communications capability including private communication window capability.

826

~~825~~. (new) The system of claim 480, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

827

~~826~~. (new) The system of claim 481, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

828

~~827~~. (new) The system of claim 482, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

829

~~828~~. (new) The system of claim 483, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication

window capability.

830

~~829~~. (new) The system of claim 484, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

831

~~830~~. (new) The system of claim 485, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

832

~~831~~. (new) The system of claim 486, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

833

~~832~~. (new) The system of claim 487, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

834

~~833~~. (new) The system of claim 488, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

835

~~834~~. (new) The system of claim 489, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

836

~~835~~. (new) The system of claim 490, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

837

~~836~~. (new) The system of claim 491, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

838

~~837~~. (new) The system of claim 492, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

839

~~838~~. (new) The system of claim 493, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

840

~~839~~. (new) The system of claim 494, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

841

~~840~~. (new) The system of claim 495, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

842

~~841~~. (new) The system of claim 496, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

843

~~842~~. (new) The system of claim 497, wherein the step of arbitrating includes:

providing group communications capability, with said controller computer, to handle communications between the one of the plurality of computers and the other of the plurality of computers, said group communications capability including private communication window capability.

844

~~843~~. (new) A system using a computer system to distribute communication

over an Internet network, the system including:

I
a plurality of participator computers connected with a controller computer through the Internet network, each said participator computer connected to an input device and to an output device; wherein:

the controller computer is programmed to carry out the steps of arbitrating, in accordance with predefined rules including a test for an authenticated user identity, to respectively determine which ones of the participator computers can communicate communications in real time over the Internet network, and providing a member associated image and respective member identity information under control of said controller computer to the ones of the participator computers.

845

~~844~~. (new) The system of claim ~~843~~, wherein the controller computer is

844

further programmed to carry out the step of:

determining a user's age corresponding to said user identity.

~~846~~

~~845~~

~~845~~. (new) The system of claim ~~844~~, wherein the controller computer is

further programmed to carry out the step of:

communicating an asynchronous message from one of the participator computers to another of the participator computers.

~~847~~

~~845~~

~~846~~. (new) The system of claim ~~844~~, wherein the controller computer is

further programmed to carry out the step of censoring unwanted communication from a member.

~~848~~

~~845~~

~~847~~. (new) The system of claim ~~844~~, wherein the step of arbitrating includes

distributing chat communications to a chat group real time over the Internet network.

I 1

~~849~~

~~848~~

~~848~~. (new) The system of claim ~~847~~, wherein the controller computer is

further programmed to carry out the step of providing private chat capability to the participator computers.

~~850~~

~~848~~

~~849~~. (new) The system of claim ~~847~~, wherein the controller computer is

further programmed to carry out the step of providing private communication window capability to the participator computers.

~~851~~

~~845~~

~~850~~. (new) The system of claim ~~844~~, wherein the controller computer is

further programmed to carry out the step of communicating human communication sound to the participator computers.

852

~~851~~. (new)

845

~~844~~

The system of claim ~~844~~, wherein the controller computer is further programmed to carry out the step of providing video to the participator computers.

853

~~852~~. (new)

851

~~850~~

The system of claim ~~850~~, wherein the controller computer is further programmed to carry out the step of providing video to the participator computers.

854

~~853~~. (new)

845

~~844~~

The system of claim ~~844~~, wherein the step of arbitrating is carried out with some of said communications including text.

855

~~854~~. (new)

845

~~844~~

The system of claim ~~844~~, wherein the step of arbitrating is carried out with some of said communications communicated out of band.

856

~~855~~. (new)

845

~~844~~

The system of claim ~~844~~, wherein the step of arbitrating is carried out with some of said communications are multimedia media messages.

857

~~856~~. (new)

844

~~843~~

The system of claim ~~843~~, wherein the controller computer is further programmed to carry out the step of controlling invisible viewing of the communications.

858

~~857~~. (new)

845

~~844~~

The system of claim ~~844~~, wherein the controller computer is further programmed to carry out the step of controlling invisible viewing of the communications.

859

~~858~~. (new)

846

~~845~~

The system of claim ~~845~~, wherein the controller computer is further programmed to carry out the step of controlling invisible viewing of the communications.

~~860~~
~~859~~. (new) The system of claim ~~846~~⁸⁴⁷, wherein the controller computer is further programmed to carry out the step of controlling invisible viewing of the communications.

~~861~~
~~860~~. (new) The system of claim ~~847~~⁸⁴⁸, wherein the controller computer is further programmed to carry out the step of controlling invisible viewing of the communications.

~~862~~
~~861~~. (new) The system of claim ~~848~~⁸⁴⁹, wherein the controller computer is further programmed to carry out the step of controlling invisible viewing of the communications.

~~863~~
~~862~~. (new) The system of claim ~~849~~⁸⁵⁰, wherein the controller computer is further programmed to carry out the step of controlling invisible viewing of the communications.

~~864~~
~~863~~. (new) The system of claim ~~850~~⁸⁵¹, wherein the controller computer is further programmed to carry out the step of controlling invisible viewing of the communications.

~~865~~
~~864~~. (new) The system of claim ~~851~~⁸⁵², wherein the controller computer is further programmed to carry out the step of controlling invisible viewing of the communications.

~~866~~
~~865~~. (new) The system of claim ~~852~~⁸⁵³, wherein the controller computer is further programmed to carry out the step of controlling invisible viewing of the communications.

~~867~~
~~866~~. (new) The system of claim ~~853~~⁸⁵⁴, wherein the controller computer is further programmed to carry out the step of controlling invisible viewing of the communications.

~~868~~
~~867~~. (new) The system of claim ~~854~~⁸⁵⁵, wherein the controller computer is

further programmed to carry out the step of controlling invisible viewing of the communications.

869

~~868~~. (new)

856

The system of claim ~~855~~, wherein the controller computer is

further programmed to carry out the step of controlling invisible viewing of the communications.

870

~~869~~. (new)

The method of claim 1, wherein receiving said communications

includes causing presentation of some of said communications by one of said participator computers in said group.

871

~~870~~. (new)

The system of claim 435, wherein one of said participator

computers in said group is programmed to carry out the step of receiving some of said communications, said receiving including causing presentation of some of said communications by one of said participator computers in said group.

872

~~871~~. (new)

A system to control communication over an Internet network, the system including:

a plurality of participator computers connected with a controller computer through the Internet network, each said participator computer connected to an input device to receive input from a user and to an output device to present communications, each said user having a user identity, the controller computer programmed to control real time Internet communication between said users by using a control database storing each said user identity, the user identity having a respective authorization for communicating multimedia in some of said communications.

873

~~872~~. (new)

872

The system of claim ~~871~~, wherein one of said participator

computers is programmed to carry out the step of receiving, including causing presentation, of some of said communications.

874

873. (new)

873

The system of claim 872, wherein one of said communications includes at least one of a video, a graphic, or a pointer-triggered message.

875

874. (new)

872

The system of claim 871, wherein said authorization for communicating multimedia includes an authorization for communicating graphical multimedia.

876

875. (new)

873

The system of claim 872, wherein said authorization for communicating multimedia includes an authorization for communicating graphical multimedia.

877

876. (new)

A method of using a computer to control communication, the method including the steps of:

connecting a plurality of participator computers with a controller computer through an Internet network, each said participator computer connected to an input device to receive input from a respective user and to an output device to present communications, each said user having a user identity, the controller computer being programmed to carry out the step of controlling real time communication between the participator computers; and

storing each said user identity and a respective authorization to communicate graphical multimedia for use in the controlling.

878

877. (new)

A system using a computer to control communication, the system including:

a plurality of participator computers connected with a controller computer

through an Internet network, each said participator computer connected to an input device to receive input from a respective user and to an output device to present communications, each said user having a user identity, the controller computer being programmed to carry out the steps of:

controlling real time communication between the participator computers, and storing each said user identity and a respective authorization to communicate graphical multimedia for use in the controlling.

879

878. (new) A method of controlling real-time communications over an Internet network, the method including the steps of:

storing, with a controller computer, a user identity and a set of privileges corresponding to the user identity;

connecting a plurality of participator computers with a controller computer through the Internet network;

receiving a login name and password corresponding to the user identity from a first participator computer of the plurality of participator computers;

determining whether the set of privileges corresponding to the user identity includes a privilege to communicate a type of message in real-time over the Internet network, the type including at least one of a video, a graphic, graphical multimedia, or a pointer-triggered message;

if the set of privileges includes a privilege to communicate the type of message in real-time over the Internet network, allowing the first participator computer to communicate the type of message to another of the plurality of participator computers; and

if the set of privileges does not include a privilege to communicate the type of message in real-time over the Internet network, not allowing the first participator computer to

communicate the type of message another of the plurality of participator computers.

⁸⁸⁰
~~879~~. (new) The method of claim ~~878~~⁸⁷⁹, further including a human communication sound as said type of message.

⁸⁸¹
~~880~~. (new) The method of claim ~~878~~⁸⁷⁹, further including the step of sending a denial message to the first participator computer of said participator computers if the set of privileges does not include a privilege to communicate the type of message in real-time over the Internet network.

⁸⁸²
~~881~~. (new) The method of claim ~~878~~⁸⁷⁹, wherein the type of message is graphical multimedia.

⁸⁸³
~~882~~. (new) The method of claim ~~878~~⁸⁷⁹, wherein the type of message is video.

⁸⁸⁴
~~883~~. (new) The method of claim ~~878~~⁸⁷⁹, wherein the type of message is graphic.

⁸⁸⁵
~~884~~. (new) A method of controlling real-time communications over an Internet network, the method including the steps of:

storing, with a controller computer, a user identity and a set of privileges corresponding to the user identity;

connecting a plurality of participator computers with a controller computer through the Internet network;

receiving a login name and password corresponding to the user identity from a first participator computer of the plurality of participator computers;

determining whether the set of privileges corresponding to the user identity includes a privilege to communicate a type of message in real-time over the Internet network, the type including human communication sound;

if the set of privileges includes a privilege to communicate the type of message in real-time over the Internet network, allowing the first participator computer to communicate the type of message to another of the plurality of participator computers; and

if the set of privileges does not include a privilege to communicate the type of message in real-time over the Internet network, not allowing the first participator computer to communicate the type of message another of the plurality of participator computers.

386

885. (new) A system controlling real-time communications over an Internet

network, the system including:

a plurality of participator computers connected with a controller computer through the Internet network; and

a controller computer programmed to carry out the steps of:

storing a user identity and a set of privileges corresponding to the user identity;

receiving a login name and password corresponding to the user identity from a first participator computer of the plurality of participator computers;

determining whether the set of privileges corresponding to the user identity includes a privilege to communicate a type of message in real-time over the Internet network, the type including at least one of a video, a graphic, graphical multimedia, or a pointer-triggered message;

if the set of privileges includes a privilege to communicate the type of message in real-time over the Internet network, allowing the first participator computer to communicate the type of message to another of the plurality of participator computers; and

if the set of privileges does not include a privilege to communicate the type of message in real-time over the Internet network, not allowing the first participator computer to communicate the type of message another of the plurality of participator computers.

~~386~~³⁸⁷. (new) The method of claim ~~885~~³⁸⁶, further including a human communication sound as said type of message.

~~887~~³⁸⁸. (new) The method of claim ~~886~~³⁸⁶, wherein said steps further include the step of sending a denial message to the first participator computer of said participator computers if the set of privileges does not include a privilege to communicate the type of message in real-time over the Internet network.

~~888~~³⁸⁹. (new) The method of claim ~~886~~³⁸⁶, wherein the type of message is graphical multimedia.

~~889~~³⁹⁰. (new) The method of claim ~~886~~³⁸⁶, wherein the type of message is video.

~~890~~³⁹¹. (new) The method of claim ~~886~~³⁸⁶, wherein the type of message is graphic.

~~891~~³⁹². (new) A system controlling real-time communications over an Internet network, the system including:

a plurality of participator computers connected with a controller computer through the Internet network; and

a controller computer programmed to carry out the steps of:

storing a user identity and a set of privileges corresponding to the user identity;

receiving a login name and password corresponding to the user identity from a first participator computer of the plurality of participator computers;

determining whether the set of privileges corresponding to the user identity includes a privilege to communicate a type of message in real-time over the Internet network, the type including a human communication sound;

if the set of privileges includes a privilege to communicate the type of message in real-time over the Internet network, allowing the first participator computer to communicate the type of message to another of the plurality of participator computers; and

if the set of privileges does not include a privilege to communicate the type of message in real-time over the Internet network, not allowing the first participator computer to communicate the type of message another of the plurality of participator computers.

I

893

892. (new) A method of using computers to communicate over an Internet network, the method including the steps of:

connecting a plurality of participator computers with a controller computer through the Internet network, each said participator computer connected to an input device and to an output device;

arbitrating with the controller computer, in accordance with predefined rules including a test for an authenticated user identity, to determine which ones of the participator computers can form a group to send and receive communications; and

sending and receiving said communications in real time over the Internet network between said participator computers in said group, one of said communications including a human communication sound.

894

896. (new) A method of using computers to communicate over an Internet

network, the method including the steps of:

connecting a controller computer with a plurality of participator computers, said connecting including connecting at least one of the plurality of participator computers with the controller computer through the Internet network, each said participator computer connected to an input device and to an output device; and

arbitrating with the controller computer, in accordance with predefined rules including a test for an authenticated user identity, to determine which of the participator computers can communicate human communication sound to an other of the participator computers over the Internet network in real time.

895

894. (new) A system using computers to communicate over an Internet

network, the system including:

a plurality of participator computers connected with a controller computer through the Internet network, each said participator computer connected to an input device and to an output device, the controller computer programmed to carry out the step of arbitrating, in accordance with predefined rules including a test for an authenticated user identity, to determine which ones of the participator computers can form a group to communicate communications in real time over the Internet network, wherein one of said communications includes human communication sound.

896

895. (new) A system using computers to communicate over an Internet

network, the system including:

a plurality of participator computers connected with a controller computer, at least one of said participator computers connected through the Internet network, each said participator computer connected to an input device and to an output device; wherein:

the controller computer is programmed to carry out the step of arbitrating, in accordance with predefined rules including a test for an authenticated user identity to determine which of the participator computers can communicate human communication sound to an other of the participator computers over the Internet network in real time.

⁸⁹⁷
~~896~~. (new) A system to control communication over an Internet network, the system including:

I
a plurality of participator computers connected with a controller computer through the Internet network, each said participator computer connected to an input device to receive input from a user and to an output device to present communications, each said user having a user identity, the controller computer programmed to control real time Internet communication between said users by using a control database storing each said user identity, the user identity having a respective authorization for communicating human communication sound in some of said communications.

⁸⁹⁸
~~897~~. (new) ⁸⁹⁷
~~896~~ The system of claim ~~896~~, wherein one of said participator computers is programmed to carry out the step of receiving, including causing presentation, of some of said communications.

⁸⁹⁹
~~898~~. (new) ⁸⁹⁷
~~896~~ The system of claim ~~896~~, wherein one of said communications includes at least one of a video, a graphic, or a pointer-triggered message.

⁹⁰⁰
~~899~~. (new) ⁸⁹⁸
~~897~~ The system of claim ~~897~~, wherein one of said communications includes at least one of a video, a graphic, or a pointer-triggered message.

901

898

~~900.~~ (new) The system of claim ~~897~~, wherein some of said communications include graphical multimedia.

902

~~901.~~ (new) A method of using a computer to control communication, the method including the steps of:

connecting a plurality of participator computers with a controller computer through an Internet network, each said participator computer connected to an input device to receive input from a respective user and an output device to present communications, each said user having a user identity, the controller computer being programmed to carry out the step of controlling real time communication between the participator computers; and

storing each said user identity and a respective authorization to communicate human communication sound for use in the controlling.

H1

903

~~902.~~ (new) A system using a computer to control communication, the system including:

a plurality of participator computers connected with a controller computer through an Internet network, each said participator computer connected to an input device to receive input from a respective user and to an output device to present communications, each said user having a user identity, the controller computer being programmed to carry out the steps of:

controlling real time communication between the participator computers, and storing each said user identity and a respective authorization to communicate human communication sound for use in the controlling.

904

~~903.~~ (new) A system controlling real-time communications over an Internet

network, the system including:

a plurality of participator computers connected with a controller computer, at least one of said participator computers being connected to the controller computer through the Internet network; and

a controller computer controlled by a program to carry out the steps of:

storing a user identity and a set of privileges corresponding to the user identity;

receiving a login name and password corresponding to the user identity from a first participator computer of the plurality of participator computers;

determining whether the set of privileges corresponding to the user identity includes a privilege to communicate a type of message in real-time over the Internet network, the type including at least one of a video, a graphic, graphical multimedia, or a pointer-triggered message;

if the set of privileges includes a privilege to communicate the type of message in real-time over the Internet network, allowing the first participator computer to communicate the type of message to another of the plurality of participator computers; and

if the set of privileges does not include a privilege to communicate the type of message in real-time over the Internet network, not allowing the first participator computer to communicate the type of message another of the plurality of participator computers.

⁹⁰⁵
~~904~~. (new) The system of claim ⁹⁰⁴~~903~~, further including human communication sound as said type of message.

⁹⁰⁶
~~905~~. (new) The system of claim ⁹⁰⁴~~903~~, wherein said steps further include the step of sending a denial message to the first participator computer of said participator computers if the set of privileges does not include a privilege to communicate the type of

message in real-time over the Internet network.

907

906. (new)

904

The system of claim 903, wherein the type of message is

graphical multimedia.

908

907. (new)

904

The system of claim 903, wherein the type of message is video.

909

908. (new)

904

The system of claim 903, wherein the type of message is graphic.

910

909. (new)

A system of controlling real-time communications over an Internet

network, the system including:

I
plurality of participator computers connected with a controller computer, at least one of said participator computers being connected to the controller computer through the Internet network; and

a controller computer controlled by a program to carry out the steps of:

storing a user identity and a set of privileges corresponding to the user identity;

receiving a login name and password corresponding to the user identity from a first participator computer of the plurality of participator computers;

determining whether the set of privileges corresponding to the user identity includes a privilege to communicate a type of message in real-time over the Internet network, the type including a human communication sound;

if the set of privileges includes a privilege to communicate the type of message in real-time over the Internet network, allowing the first participator computer to communicate the type of message to another of the plurality of participator computers; and

if the set of privileges does not include a privilege to communicate the type of

message in real-time over the Internet network, not allowing the first participator computer to communicate the type of message another of the plurality of participator computers.

911

~~910~~. (new) A method of controlling real-time communications over an Internet network, the method including the steps of:

storing, with a controller computer, a user identity and a set of privileges corresponding to the user identity;

connecting a plurality of participator computers with a controller computer, at least one of the participator computers being connected with the controller computer through the Internet;

receiving a login name and password corresponding to the user identity from a first participator computer of the plurality of participator computers;

I
determining whether the set of privileges corresponding to the user identity includes a privilege to communicate a type of message in real-time over the Internet network, the type including at least one of a video, a graphic, graphical multimedia, or a pointer-triggered message;

if the set of privileges includes a privilege to communicate the type of message in real-time over the Internet network, allowing the first participator computer to communicate the type of message to another of the plurality of participator computers; and

if the set of privileges does not include a privilege to communicate the type of message in real-time over the Internet network, not allowing the first participator computer to communicate the type of message another of the plurality of participator computers.

912

~~911~~. (new) The method of claim ~~910~~, further including a human communication sound as said type of message.

911

913

~~912~~. (new)

911

The method of claim ~~910~~, further including the step of sending a denial message to the first participator computer of said participator computers if the set of privileges does not include a privilege to communicate the type of message in real-time over the Internet network.

914

~~913~~. (new)

911

The method of claim ~~910~~, wherein the type of message is graphical multimedia.

915

~~914~~. (new)

911

The method of claim ~~910~~, wherein the type of message is video.

916

~~915~~. (new)

911

The method of claim ~~910~~, wherein the type of message is graphic.

917

~~916~~. (new)

A method of controlling real-time communications over an Internet network, the method including the steps of:

storing, with a controller computer, a user identity and a set of privileges corresponding to the user identity;

connecting a plurality of participator computers with a controller computer, at least one of said participator computers being connected with the controller computer through the Internet network;

receiving a login name and password corresponding to the user identity from a first participator computer of the plurality of participator computers;

determining whether the set of privileges corresponding to the user identity includes a privilege to communicate a type of message in real-time over the Internet network, the type including a human communication sound;

if the set of privileges includes a privilege to communicate the type of message in real-time over the Internet network, allowing the first participator computer to communicate the type of message to another of the plurality of participator computers; and

if the set of privileges does not include a privilege to communicate the type of message in real-time over the Internet network, not allowing the first participator computer to communicate the type of message another of the plurality of participator computers.

918

~~917~~. (new)

A system to control communication over an Internet network, the system including:

Y \ a plurality of participator computers connected with a controller computer, wherein at least one of said participator computers is connected with said controller computer through the Internet network, each said participator computer connected to an input device to receive input from a user and to an output device to present communications, each said user having a user identity, the controller computer programmed to control real time Internet communication between said users by using a control database storing each said user identity, the user identity having a respective authorization for communicating human communication sound in some of said communications.

919

~~918~~. (new)

A system to control communication over an Internet network, the system including:

a plurality of participator computers connected with a controller computer through the Internet network, each said participator computer connected to an input device to receive input from a user and to an output device to present communications, each said user having a user identity, the controller computer programmed to control real time Internet communication between said users by using a control database storing each said user identity,

the user identity having a respective authorization for communicating human communication sound in some of said communications.

⁹²⁰
~~919~~. (new) The system of claim ⁶⁰¹~~600~~, wherein said sound is comprised of a human communication sound.

⁹²¹
~~920~~. (new) The system of claim 170, wherein one of said participator computers in said group is programmed to carry out the step of receiving some of said communications, said receiving including causing presentation of some of said communications by one of said participator computers in said group.

⁹²²
~~921~~. (new) The system of claim 409, wherein one of said participator computers in said group is programmed to carry out the step of receiving some of said communications, said receiving including causing presentation of some of said communications by one of said participator computers in said group.

⁹²³
~~922~~. (new) The system of claim ⁶⁰⁵~~604~~, wherein one of said participator computers in said group is programmed to carry out the step of receiving some of said communications, said receiving including causing presentation of some of said communications by one of said participator computers in said group.

⁹²⁴
~~923~~. (new) The system of claim ⁸⁴⁴~~843~~, wherein one of said participator computers is programmed to carry out the step of receiving some of said communications, said receiving including causing presentation of some of said communications.

⁹²⁵
~~924~~. (new) The system of claim ~~600~~⁶⁰¹, wherein the plurality of participator computers are from more than an audience of a particular internet service provider.

⁹²⁶
~~925~~. (new) The system of claim ~~876~~⁸⁷⁷, further including the step of receiving some of said communications, said receiving including causing presentation of some of said communications.

⁹²⁷
~~926~~. (new) The system of claim ~~877~~⁸⁷⁸, wherein one of said participator computers is programmed to carry out the step of receiving some of said communications, said receiving including causing presentation of some of said communications.

⁹²⁸
~~927~~. (new) The system of claim ~~878~~⁸⁷⁹, wherein one of said participator computers is programmed to carry out the step of receiving some of said communications, said receiving including causing presentation of some of said communications.

⁹²⁹
~~928~~. (new) The system of claim ~~884~~⁸⁸⁵, further including the step of receiving some of said communications, said receiving including causing presentation of some of said communications.

⁹³⁰
~~929~~. (new) The system of claim ~~885~~⁸⁸⁶, wherein one of said participator computers is programmed to carry out the step of receiving some of said communications, said receiving including causing presentation of some of said communications.

⁹³¹
~~930~~. (new) The system of claim ~~891~~⁸⁹², wherein one of said participator computers is programmed to carry out the step of receiving some of said communications, said

receiving including causing presentation of some of said communications.

⁹³²
~~931~~. (new) The system of claim ~~892~~⁸⁹³, further including the step of receiving some of said communications, said receiving including causing presentation of some of said communications.

⁹³³
~~932~~. (new) The system of claim ~~893~~⁸⁹⁴, further including the step of receiving some of said communications, said receiving including causing presentation of some of said communications.

⁹³⁴
~~933~~. (new) The system of claim ~~894~~⁸⁹⁵, wherein one of said participator computers is programmed to carry out the step of receiving some of said communications, said receiving including causing presentation of some of said communications.

⁹³⁵
~~934~~. (new) The system of claim ~~895~~⁸⁹⁶, wherein one of said participator computers is programmed to carry out the step of receiving some of said communications, said receiving including causing presentation of some of said communications.

⁹³⁶
~~935~~. (new) The method of claim 166, wherein said step of programming is carried out with said sound comprising a human communication sound.

⁹³⁷
~~936~~. (new) The system of claim ~~901~~⁹⁰², further including the step of receiving some of said communications, said receiving including causing presentation of some of said communications.

938
~~937~~

903
~~902~~

(new) The system of claim ~~902~~, wherein one of said participator computers is programmed to carry out the step of receiving some of said communications, said receiving including causing presentation of some of said communications.

939
~~938~~

904
~~903~~

(new) The system of claim ~~903~~, wherein one of said participator computers is programmed to carry out the step of receiving some of said communications, said receiving including causing presentation of some of said communications.

940
~~939~~

(new) The system of claim 599, wherein said sound is comprised of a human communication sound.

941
~~940~~

910
~~909~~

I
(new) The system of claim ~~909~~, wherein one of said participator computers is programmed to carry out the step of receiving some of said communications, said receiving including causing presentation of some of said communications.

942
~~941~~

911
~~910~~

(new) The system of claim ~~910~~, wherein one of said participator computers is programmed to carry out the step of receiving some of said communications, said receiving including causing presentation of some of said communications.

943
~~942~~

917
~~916~~

(new) The system of claim ~~916~~, further including the step of receiving some of said communications, said receiving including causing presentation of some of said communications.

944
~~943~~

918
~~917~~

(new) The system of claim ~~917~~, wherein one of said participator

computers is programmed to carry out the step of receiving some of said communications, said receiving including causing presentation of some of said communications.

⁹⁴⁵
~~944~~. (new) The system of claim ⁹¹⁹~~918~~, wherein one of said participator

computers is programmed to carry out the step of receiving some of said communications, said receiving including causing presentation of some of said communications.

⁹⁴⁶
~~945~~. The method of claim 170, wherein the step of connecting is carried out with the plurality of participator computers from more than an audience of a particular internet service provider.

⁹⁴⁷
~~946~~. The system of claim 435, wherein the plurality of participator computers are from more than an audience of a particular internet service provider.

⁹⁴⁸
~~947~~. The method of claim ⁸⁹⁴~~893~~, wherein the step of connecting is carried out with the plurality of participator computers from more than an audience of a particular internet service provider.

⁹⁴⁹
~~948~~. The system of claim ⁸⁹⁶~~895~~, wherein the plurality of participator computers are from more than an audience of a particular internet service provider.
